Omega laboratory is a hospital based laboratory which caters to a population of walk-in patients from in & around Mangalore and inpatients of the Hospital. Through round-the-clock service, 365 days a year at economical prices, Omega Laboratory ensures dedicated services with emphasis on accuracy, precision, prompt and timely reporting. The Omega Laboratory performs close to 20000 tests per month which are carried out by well qualified laboratory staff.

The diagnostic Laboratory in the hospital is well equipped and capable of providing a complete range of investigations in the areas of:

- Clinical Biochemistry
- Haematology
- Histopathology
- Clinical Pathology
- Microbiology and Serology

Many lab tests are carried out on automated testing machines or with special kits which contain testing chemicals of controlled quality so that the tests are reproducible and reliable. Other tests require considerable manual handling. Quality control procedures are followed at the laboratory to control and minimize the errors on a regular basis.
